PROFILE SUMMARY

- Business Systems Analyst with over 3 years of expertise in **Business Analysis, ITSM, Enterprise Applications, and Agile Delivery**, enabling alignment between business requirements and technology solutions.
- Led enterprise enablement of **generative AI capabilities**, authoring the risk assessment that secured executive approval.
- **Primary application owner and Level 3 escalation point** for an enterprise SaaS estate supporting ~5,000 users, with direct ownership of vendor relationships.
- Strong foundation in **Requirements Gathering, Process Mapping, Gap Analysis, User Stories, BRDs/FRDs, and UAT**, supporting effective solution delivery and stakeholder alignment.
- Recognized with **Star Performer** and **SPOT Awards** for contributions to process optimization, service excellence, and operational improvements across critical business functions.
- Combines a **First Class Honours MSc in Business Analytics** with expertise in **ITIL, ServiceNow, SaaS Administration, Access Governance, and Data Analytics**, delivering a blend of business, technology, and governance acumen.

CORE COMPETENCIES

Requirements Gathering & Analysis	Enterprise Application Management	Agile Scrum Delivery
Stakeholder Management	Change & Release Management	User Acceptance Testing (UAT)
Business Process Mapping	IT Service Management (ITIL)	Access & Governance Management
Generative AI Enablement	Vendor & Licence Management	Data Reconciliation & Reporting

TECHNICAL SKILLS

- **ITSM & Service Management:** ServiceNow, Jira, Jira Service Management, Confluence, ITIL Practices
- **Identity & Access Management:** Okta, OneLogin, SAML SSO, Active Directory (AD), DNS Domain Verification
- **Process Mapping & Documentation:** Lucidchart, SOP Development, Runbook Documentation, Knowledge Base Management, Disaster Recovery & BCP Documentation
- **Data Analysis & Reporting:** SQL, Python, Microsoft Excel, Power Query
- **Business Intelligence & Visualization:** Tableau, Power BI
- **Generative AI:** AI Enablement & Risk Assessment, Microsoft Copilot, Figma AI, Adobe Firefly, Claude, ChatGPT
- **Enterprise Applications:** Figma Administration, Adobe Administration, Lucidchart Administration, Google Workspace, Slack, Asana, Smartsheet
- **Project & Collaboration Tools:** Jira, Lucidchart
- **Governance & Compliance:** Access Reviews, Access Provisioning, Approval Authority, Audit Evidence, Policy Authoring, SaaS Application Administration
- **Analytics & Data Management:** Data Cleaning, Data Integration, Cross-System Reconciliation, Feature Engineering, Exploratory Analysis

SOFT SKILLS

Negotiation & Conflict Management	Team Building & Interpersonal Skills
Analytical Problem Solving	Visionary and Decision Making
High Business Ethics	Leadership and Delegation

EDUCATION

M.Sc. (Business Analytics) | First Class Honours
University College Cork, Ireland | Sep 2025 - Sep 2026

B.E. (Computer Engineering) | CGPA: 8.36/10
Indira College of Engineering & Management, University of Pune | 2018 - 2022

WORK EXPERIENCE

Business Systems Analyst - Enterprise Applications | Senior Associate Consultant

Jade Global Software Pvt. Ltd. | Client: Uber Technologies Inc. | Jul 2023 - Aug 2025

- Primary application owner and L3 escalation point for Figma, Adobe, and Lucidchart across ~5,000 Uber users; resolved incidents beyond L1/L2 scope and engaged vendors directly to restore service.
- Led enterprise enablement of generative AI (Figma AI, Adobe Firefly), authoring the risk assessment - data ingested, user access scope, sensitive data exposure, required add-ons - that secured onboarding and M&A approval.
- Owned end-to-end delivery of the Figma OneLogin-to-Okta SAML SSO migration for ~5,000 users: 50+ Jira user stories, a Definition of Ready, and the Change Summary Document presented at CAB to secure approval on risk, rollback, and end-user impact.
- Managed licence allocation and utilisation across 595 seats by business unit using SQL, Tableau, and Google Sheets on UberHub, driving downgrade, cost-allocation, and reclamation decisions for leadership.
- Owned cross-system reconciliation across ServiceNow, Jira, Adobe Admin Console, and Google Workspace, and built the monthly reporting pack covering SLA attainment, volumes, ageing, backlog, reopen rate, and CSAT.
- Led an escalation-reduction initiative using process mapping and BRDs to analyse ticket volume and workflow gaps, training L1/L2 teams to resolve previously escalated issues - cutting escalations by 50%.
- Held privileged administrative access: created workspaces under the Uber instance, assigned workspace ownership, and executed approved transfers of sensitive files between teams.

- Owned vendor relationships as Uber's counterpart to vendor customer success managers - direct Slack channels with Figma, licence discussions, defect escalation, and sandbox provisioning.
- Held Active Directory approver-group access as final authorisation point for enterprise application access; direct point of contact for Uber's Product team.
- Authored Uber's Figma Guest Access Policy - internal sponsorship, access timelines, licence assignment, signed NDA - published org-wide on UberHub.
- Delivered a Carshare workspace migration of 500+ files via service accounts with post-migration access restricted to legal and two named owners, and federated authentication for Uber Freight via DNS domain verification.
- Authored SOPs, runbooks, knowledge articles, disaster recovery and business continuity documentation, and a recurring Quarterly Access Review process; rotated as Scrum Master running standups and sprint capacity planning.

Systems Analyst - Applications Support | Associate Analyst

Jade Global Software Pvt. Ltd. | Aug 2022 - Jun 2023

- Delivered L2 application support through ServiceNow and Jira, resolving 30-40 tickets weekly within SLA commitments.
- Monitored system dashboards and alerts during daily triage, prioritising service disruptions before escalation.
- Wrote SQL against the internal employee/HR database to diagnose login failures, attendance-sync errors, and corrupted profile data, resolving directly or escalating with detailed findings.
- Queried backend databases to trace workflow breakdowns in the time-tracking and project-allocation system, tracking fixes through Jira to restored functionality.
- Generated SQL-based reports and Excel dashboards on resolution times, recurring errors, and server/database storage utilisation for management review.
- Administered user access controls and permissions in line with data governance standards, and executed scheduled patches and system updates within deployment windows.
- Maintained configuration of the internal ticketing and asset management platform, supporting accurate and consistent issue tracking.

INTERNSHIP

Intern - Cloud ADM Team

Jade Global Software Pvt. Ltd. | Feb 2022 - Jul 2022

- Supported cloud application administration, incident management, and service delivery activities across enterprise environments.
- Assisted with operational reporting, process documentation, and ITSM-driven support functions, building foundational expertise in enterprise application management.

ACADEMIC PROJECT

Digital Financial Exclusion in Ireland | MSc Business Analytics Group Dissertation

University College Cork | Central Bank of Ireland Data Challenge 2026

- Owned scoping, cleaning, and integration of 450,000 synthetic Irish consumer profiles with regional banking infrastructure registries in Python, resolving missing values and duplicates ahead of modelling.
- Conducted the literature review and problem framing, grounding the project in the Central Bank of Ireland's Consumer Protection Code and UN SDG 9.3/10.
- Authored AS-IS / TO-BE process diagrams mapping how payment service providers currently identify at-risk customers versus the proposed analytics-driven state.
- Designed and built the three-layer Streamlit dashboard translating the team's predictive model into portfolio, individual scoring, and regional priority views.

CERTIFICATIONS

- Google Data Analytics Professional Certificate - Coursera
- Microsoft Azure Data Fundamentals (DP-900) - in progress
